HARD SKILLS

- Vue
- React
- Next.js
- JavaScript
- TypeScript
- jQuery
- HTML & CSS
- Tailwind
- Bootstrap
- Figma
- Git
- Laravel
- ASP.NET
- Node.js
- Python
- REST APIs
- SQL & Database Design
- GeoServer
- OpenStreetMap
- AI-assisted Dev

SOFT SKILLS

- Agile
- Critical Thinking
- Teamwork
- Problem Solving
- Communication
- Task Management

LANGUAGES

- Khmer (Native)
- English (intermediate)

PROFILE

Software Developer who works with the team on projects from start to finish, from analyzing the requirements and planning the project structure to building systems that run smoothly and securely. Quick to learn new technology, flexible under pressure, and committed to delivering reliable products on time.

WORK EXPERIENCE

Digital Government Committee (DGC) **2023 - Present**

Web Developer

- Built GIS apps (Vue.js, OpenStreetMap, GeoServer, Google Maps) for internet connectivity, air quality, and environment data.
- Optimized GIS map rendering so thousands of markers load and move smoothly without slowing down the browser.
- Rebuilt the legacy Windows Forms Logistics Gateway into a high-performance Single Page Application (SPA) using Vue, Pinia, and Tailwind, reducing system lag, cutting out redundant legacy workflows, and streamlining core logistics tasks for faster end-to-end execution.
- Involved end to end, from problem discovery and solution design to UX/UI, front-end architecture, and quality testing.
- Developed data entry screens and forms for court record systems, designed for fast and accurate everyday use.
- Delivered a fuel trip order system end to end, from business analysis and database design to front-end and back-end with Laravel and Vue.
- Applied OWASP Top 10 practices to build secure applications that behave consistently across browsers.
- Took part in Agile workflows by breaking down tasks, setting priorities, testing features, and managing code with Git.

Z1 Flexible Solution **2022 - 2023**

Back-end Web Developer

- Began my career as a back-end developer, building an internal Laravel Backpack tool that let approved support staff fix urgent data errors securely, while collaborating with UX/UI, front-end, QA, and DevOps teams.

EDUCATION

Bachelor's Degree in Computer Science 2024 - 2025

Asia Euro University | Final project in database design

Web Development 2020 - 2022

Passerelles Numériques Cambodia | Featured student
